About this handout.

The QR code to the left opens our patient resource library. Scan with your phone camera to read about your condition, learn what to expect after surgery, or find hand therapy and nerve study locations near you.

For medical emergencies, call 911.
For non-urgent questions, call your office location listed below.

SCHEDULING

Hand Therapy

How to schedule your CHT visit

Hand Therapy (CHT) is rehabilitation led by a certified hand therapist — exercises, splints, scar management, and return-to-activity guidance. Locations across Queens, Long Island, and Manhattan.

EMG / Nerve Conduction Study is a test that measures how well your nerves carry signals. It helps pinpoint the source of numbness, tingling, or weakness in your hand or arm.

EMG / Nerve Study

How to schedule your nerve study
